

Latino Review reveals that Tony Stark will be getting a customised (and incredibly rare) Bugatti as his new ride in Shane Black's Iron Man 3. Actor Robert Downey Jr. will be seen behind the wheel of the 2014 Veyron prototype which has a price tag of a whopping \$2 million dollars. The car is already on the way to the set according to the report, so whether we'll end up seeing it in any future leaked set photos remains to be seen. Here is a description of the vehicle also courtesy of the site. The new model will also feature an all-new body said to be inspired by the original Bugatti Veyron concept of 1999. This concept was designed by the current head of Bugatti design, Walter de Silva – former SEAT head of design. The new car will have a top speed of 434km/h... in case the first edition wasn't fast
