

EW has debuted the first deleted scene from Star Wars: The Force Awakens, which is getting a new Blu-ray release next month. The excised sequence involves unsavory junkyard owner Unkar Plutt catching up with Rey at Maz's castle to seek retribution for her stealing The Millennium Falcon. Rey stands up for herself, but Plutt disarms her and demands that she go with him. Unfortunately for the alien, Chewbacca then steps in and the two have a standoff before the clip cuts away. Chances are you already know what happens next thanks to the official novelization: just as Plutt disarmed Rey, Chewie disarms him... literally. This is a callback to Han's warning to Threepio from the original Star Wars movie, after the droid chastises the wookiee for complaining about losing his Dejarik game with Artoo. You can see the full scene for yourselves on the new Blu-ray, which will hit shelves on November 15.
