

The first downloadable content (DLC) pack for DC Universe Online (DCUO), “Fight for the Light” is now available. Featuring favorite DC Universe hero, Green Lantern and the introduction of the game’s seventh power set, Light, the new DLC pack is now available for download on both the PC and PlayStation 3 computer entertainment system. In times of great need, the Green Lantern and Sinestro Corps can give out “reservist rings” to worthy heroes or enthusiastic villains who will help restore the balance of the universe for their side; these players can be deputized into either Corps and fight alongside legendary ring-bearers. In addition to the new light power set, DCUO players will also be able to interact with characters and missions based on the Green Lantern mythos in all-new gameplay scenarios. MORE DCUO Screenshots
