

Last December, it was revealed that Warner Bros. would stop producing any more Harry Potter DVD's and Blu-ray's; meaning that once the current stock runs out, that would be it. At the time, many speculated that the reason for this was that they would eventually release one single box set containing each of the films. It looks like that is finally here, as the following collection has been listed on Amazon. However, the price (a whopping \$349.99) may put some fans off from picking up the impressive sounding collection. There is currently no release date, although you can get a taste of what to expect from it below. Contains 31 discs, inclusive of all content ever previously released, in addition to over 5 hours of never before seen special features, in a limited and numbered edition. 18 Movie Discs: -Harry Potter and the Sorcerer's Stone (Theatrical Version and Extended Cut) -Harry Potter
