

Earlier today, the Russo Brothers shared yet another behind the scenes image from Avengers: Infinity War as they continue to scout locations for the movie, but why did they then decide to delete it? Well, that has everyone talking, but a copy of the photos has remained online. Many believe that this could be Latveria and that Marvel Studios has somehow got their hands back on Doctor Doom (a key player in The Infinity Gauntlet comic book), but chances are this is actually Asgard. If so, it makes sense that the filmmakers would delete it as the movie paying a visit to that location is a fairly big plot point. We'll have to wait and see, but it definitely seems like Avengers: Infinity War is going to take us to some very interesting places. Do you have any theories about this photo? If so, let us know them below.
