

Fans have been wondering if X-23 would have her foot-claws in Logan, and from the looks of this new promo for James Mangold's final Wolverine movie, she will indeed. The clip sees Dafne Keen's Laura undergoing a distressing operation to equip her with her lethal adamantium weapons, before cutting to the young mutant testing them out on her own arm. Logan is set to premiere at the Berlin Film Festival this weekend, and the first reviews shouldn't be too far behind. In the near future, a weary Logan cares for an ailing Professor X in a hide out on the Mexican border. But Logan's attempts to hide from the world and his legacy are up-ended when a young mutant arrives, being pursued by dark forces. Logan claws its way into theaters on March 3.
